

The United States of America

This is to certify that I,

have pledged to never take or abuse drugs. In making this pledge I acknowledge the importance of a strong body and mind free from the cloud of drugs, the value of myself as a person living up to my full potential, and that I will determine my future, not a substance. I have decided that getting high on intelligence- -doing well in school and all other aspects of my life- -and not getting high on drugs is the way to achieve my goals. Since my life affects many others, I ask those who love me to help me and to offer guidance in staying drug free.
